THE i-SENSYS RANGE
ULTRA-FAST, FEATURE-PACKED LASER PRINTERS

The i-SENSYS range consists of a portfolio of productive and efficient desktop devices offering a wide range of features and functionality. Compact in profile but feature packed, keep your business running efficiently without the hassle of ongoing maintenance.

These laser printers provide a total portfolio of flexible desktop printers that can offer SOHO self-managed solutions, as well as being part of a larger enterprise solution.

As well as providing the simplicity and hassle-free benefits that modern workers need, the products tick the boxes for IT managers and support staff to be able to manage the devices in a cost effective manor. Remote management and simple installation ensure productivity isn't compromised with a reliable device always by your side.

A portfolio of productive and efficient desktop devices offering a wide range of features and functionality.

TAKE **PRODUCTIVITY** TO THE NEXT LEVEL

The i-SENSYS application library is designed to enhance print, scan and copy productivity and give you greater control over your print applications.

We understand that minimal disruption and maintenance is key, and that is why the range of i-SENSYS printers come with a host of features to keep you productive.

Keep control of your toner levels through monitoring on your device display, remote user interface and smartphone & tablets. Wherever you are, you can easily check when toner levels are running low and manage more efficiently.

The high-capacity paper trays ensure that you're topped up for

longer and consequently reducing down time. Fast print speeds, double sided printing and single-pass double sided scanning keep you equipped for any job at hand. Supporting multiple paper weights, the i-SENSYS range can support you with a range of print types.

Gone are the days when you needed specialist help to manage and replace toner cartridges. These smart toner cartridges are compact, high in yield and easy to install.

The intuitive and highly customisable 5" touch screen LCD display enables productivity with the touch of a button on selected models

SETTING UP IS CHILD'S PLAY

Setting up your new device is as easy as 1, 2, 3. Straight out of the box, with a plug & play configuration, follow a simple on-screen instruction and you're good to go. Time is precious and with no external support required, you can self manage the set up with minimal disruption to your business. The large colour touch screen on selected models help to customise your functionality and view set-up functions.

PERSONALISE TO SUIT YOUR BUSINESS

Canon's unique i-SENSYS Application Library enables you to easily customise function buttons on your printer's large 5″ LCD touch screen – so you can meet your specific needs and increase productivity with fast, one touch control of daily tasks. We created five new applications in 2019, so you now have twelve great options to choose from. You can print stored forms, scan-to Email and copy documents with defined settings using a single tap plus display important or helpful messages on the screen.

For retail

For office
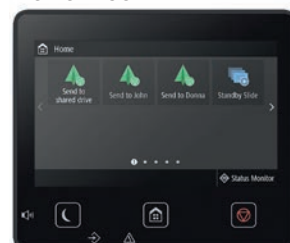

STRAIGHTFORWARD SECURITY AND CONTROL

Secure PIN printing
Protect confidential documents with simple PIN printing in three easy steps:
1) Assign a PIN code when printing from a PC or mobile device
2) The document is then sent to the printer and held securely
3) Select the secure print icon on the device and enter the PIN to release the document

Universal Login Manager
The Universal Login Manager helps boost control in the following key areas:
– Convenient user authentication
– Control at device and user level
– Create personalised work flows
– Device and user-based usage and cost tracking with reporting tools

uniFLOW
uniFLOW is a software solution that offers added levels of security and control. Simple and secure cloud-based authentication, scanning, and accounting with the below key functionality:
– Simple wizard activation
– Flexible authentication
– Set costs per device, function, and user
– Track costs per device, function, and user
– Cloud based infrastructure

Register any desired image or text in the form of a slide and automatically display it on the operation panel like a screen saver.

Access your most frequent tasks directly from the homescreen

i-SENSYS GENUINE TONER

Canon toner is designed to work seamlessly with Canon printers to provide you with the fast fusing performance and high quality print you expect. Canon toner technology ensures uncompromised results. For beautiful, long lasting print quality, trust Canon engineered toner.

When buying a Canon cartridge always look out for the hologram, with its colour change technology, and the 'Genuine' Canon logo on the outside of the package.

Then you can be certain that you'll get the very best print quality from your Canon printer, fax machine or multifunctional device. The phrase "for use in Canon products" does not mean it's an original Canon cartridge.

High quality

Fast & long Life

Easy handling

Compact & high capacity

Smart Toner cartridge

Toner seal auto removal

100% RECYCLE AND RECOVERY CANON'S TONER CARTRIDGE RETURN

Canon works with customers to ensure appropriate recycling of Canon products, reducing impact on the environment and local communities.

Canon's commitment and contribution to the environment and to the world community are an integral part of its management structure, product design, manufacturing, and corporate culture. To learn more and to process a cartridge return, please visit the website.

TONER CARTRIDGES

All new black & white and colour toner technology has been improved.

This toner is more durable, lasts longer , and melts quickly at lower temperature.

1. Polymer layer melts quickly at low temperatures. This produces fast print speeds & low energy consumption

2. Wax center

3. Strong outer shell for improved durability & stability
