

Enhanced control for print environments

SECURITY & COST CONTROL PACK

you can

It's easy to introduce a powerful new set of capabilities into your Canon multifunctional printers (MFPs) with the **Security & Cost Control Pack**. This highly cost-effective software accessory improves document security and with activity tracking, can help save money too.

Activity tracking & cost savings

Details of every print, copy and scan job and its costs are recorded, enabling managers to obtain reports showing usage for each user. The software distinguishes between black-and-white and colour printing, paper sizes, and records all scanning and sending activities.

You can use this valuable information to save money, for example, by requesting that users frequently printing in colour restrict this activity to specific document types.

Secure printing

Now you can ensure confidential information stays that way. Secure printing means that documents are printed only when the relevant user authenticates themselves at the MFP. This eliminates the problem of overflowing printer output trays, where uncollected documents can be viewed by those not authorised to do so. And since prints are retrieved only when they're needed, there are no forgotten documents and therefore less paper wastage.

Convenient printing

Thanks to My-Print-Anywhere, documents can be picked up at any device on the network where the application is stored. Users simply identify themselves at the most convenient MFP and the relevant documents are instantly printed.

Flexible identification methods

A number of ways exist for users to authenticate themselves at the Canon MFP. For example, PIN numbers, usernames and passwords or job codes. With Security & Cost Control Pack you can also use the HID contactless technology cards provided as an option with the software.

Scalable solution

As your business grows and your number of devices increases or you simply just need more control, you can upgrade to uniFLOW Output Manager to continue managing your print process.

Key benefits:

- **Savings** - Know usage to reduce costs
- **Security** - Keep sensitive information in the right hands
- **Convenience** - Collect prints wherever best suits
- **Control** - Track usage and costs

Specification: Security & Cost Control Pack

Compatible devices Connectivity	Any UFR II, MEAP capable imageRUNNER Supports up to 5 devices (serverless) Supports up to 50 users (serverless)
Compatible environments	Windows 2000 onwards
Operating environment CPU HDD capacity Memory Paging file size OS	PentiumIII 800MHz 256MB 100MB or more 256MB or more 192MB or more Windows 2000 Professional SP4 Windows XP Professional SP2 Windows Vista Business/Ultimate-Edition
Web browser	Microsoft Internet Explorer 6.0 SP1/SP2 Microsoft Internet Explorer 7.0 Although IE7 allows tabbed browsing, it is a premise for AM4M to use one tab.
<p>Some images are simulated for clarity of reproduction. All data is based on Canon's standard testing methods. This leaflet and the specifications of the product have been developed prior to the date of product launch. Final are subject to change without notice.™ and ©. All company and/or product names are trademarks and/or registered trademarks of their respective manufacturers in their markets and/or countries.</p>	

Security & Cost Control Pack process

1. User prints their job to the Serverless Secure Print queue. User chooses a method that they will use to identify themselves at the device. Print job is stored on the user's PC.
2. User walks to any of the Canon iR devices and identifies themselves using their chosen method.
3. User is shown a list of their waiting jobs and selects the ones they want to release.
4. Selected jobs are pulled from the client's PC to the Canon iR where they are printed.
5. iW Accounting Manager for MEAP accounts the job.
6. Administrator can check the usage of all devices from a PC Administrator on the network.
